Ilkin Rahimov

Full Stack Engineer

Full Stack Web Developer, especially skilled in Javascript. Has good communication and leadership skills, as well as the capability to work in a team. With minor supervision, can both manage projects and accomplish tasks in a short time. Working on Javascript and its tools for more than 4 years. Excellent skills on Node.js, MongoDB, and other back-end tools. I can create and develop REST APIs, Back-End & Front-End based applications for web.

PERSONAL PROJECTS

zElm (12/2022 - 12/2022)
- zElm is an educational application made for students to help them learn their lessons in effective and funny way. Application provides various kinds of opportunities for students, namely Mock exams, Online tutoring lessons, Question/Answer blog, and so on. This project was initiated at STEAM International Festival for Hackathon category and took 2nd place in that competition.

X-Ray Detection Software
- X-Ray Detection Software is a web based application which analyzes and provides information about presumable infections in the x-ray. The aim is to create a free and easy template system with a view to creating various kinds of upsides, namely saving expenses, exact diagnosis, and time efficient process for the patients worldwide.

Secret.-Social Media&Blog
- https://github.com/ragimof1/Secret
- A social media platform similar to Twitter, created for people who want to share articles, start a conversation, or ask a question, but anonymously.
